Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

The following action is in response to the amendment received November 9, 2004.

Information Disclosure Statement

Receipt is acknowledged of the Information Disclosure Statement filed November 9, 2004. The cited document has been considered.

Drawings

The replacement sheets of drawings were received on November 9, 2004. These drawings are acceptable.

Specification

The amendment to the specification overcomes the previous objection. Accordingly, the objection to the specification is withdrawn.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 6 and 7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 6 now recites that the outer ring comprises

recess portions formed at the inner peripheral face of the hole. This appears to be inaccurate since the "hole" is defined as being in the "outer ring fitting member" not in the outer ring. Note, too, that claim 7 recites that the outer ring has portions that fit into the recess portions. This further indicates that the recess portions are in the outer ring fitting member rather than in the outer ring.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-21 are rejected under 35 U.S.C. 102(b) as being anticipated by Kashio et al. ('705). The Kashio et al. device discloses a one-way clutch comprising an outer ring fitting member 2 having a hole in which a recess portion (between projections 11 in Fig. 13) is formed, a shaft 8, an annular outer member 1 having cam faces 7, a plurality of rollers 3, and an annular retainer 4, 19. The retainer has an axially projected portion 19 and a projection 18 projecting radially from the axial projection for engaging in the recess portion to prevent relative rotation between the retainer and the outer ring fitting member. The retainer further includes a plurality of urging members 20. The number of radial projections in Kashio et al. corresponds to the number of recess portions between the projections 11 in the outer ring fitting member. The outer ring 1 also includes a plurality of expanded portions (between recesses 10) for receipt in the recesses

between projections 11 in the outer ring fitting member. The surfaces of the projections on the retainer and the corresponding surfaces of the recess portions that engage each other are substantially planar, at least at the surface of engagement.

Response to Arguments

Applicant's arguments with respect to claims 1-21 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
